

# STITCHES *creation*

**We provide branding  
and decoration solutions  
since 1993, especially  
embroidery, screen printing,  
heat transfers, laser  
engraves, and more.**

# EMBROIDERY

Embroidery is the most popular method of apparel branding and decoration. The advantages of embroidery are stable, durable, brilliant. The disadvantage of embroidery is the limitation on small texts. Small texts in size of less than 4mm or 1/8 inch are difficult to use embroidery. We can put embroidery on almost any fabric and any product. graphics are set up once and used for unlimited times. Price is affected by the size of the graphic, not the colors. The larger size the higher price. Embroidery is most cost effective for small graphics and smaller runs.

## Advantages

Wide range of effects in both texture and thread color. Offers both high durability and high perceived value as a way to enhance your brand and company image.

## Applications

Recommended products: Polos, Technical outerwear, Fleece, Team wear, Corporate casual, Bags

# SCREEN PRINTING

screen printing is a popular method of apparel branding and decoration. The advantages of screen printing are stable, durable, brilliant. Screen printing is most suitable for T-shirts and sweatshirts. Not every type of product can be screen printed, such as golf bags, suitcases, and lined clothing. Graphics are set up once and used for unlimited times, but there is machine set up costs each time the graphic is used. Price is affected by the colors of the graphic, not much of the size. The more colors the higher price. Screen Printing is most cost effective for large graphics and large runs.

## Advantages

Suitable for large format applications at a low cost with a large impact.

## Applications

Recommended products: Polos, Softshells, Lightweight shells, Team wear, Bags.

# HEAT TRANSFER

Heat transfer is a popular method of apparel branding and decoration. Heat transfer graphics may be affected by the fabric's chemical treatments and may become unstable. Heat transfer graphics need to be washed inside out, otherwise they may be worn and torn very quickly. Graphics are set up once and used for unlimited times, but there is machine set up costs each time the graphic is used. Price is affected by the size of the graphic, not about the colors. The larger size the higher price. Heat transfer is cost effective for small graphics and smaller runs.

## Advantages

Clean and can be applied quickly with high detail. Ideal for waterproof fabrics, athletic and performance apparel. Environmentally friendly inks provide long lasting durability.

## Applications

Recommended products: Polos, Softshells, Technical outerwear, Team wear, Bags.

# APPLIQUE

Applique is a combination of embroidery and other fabrics or decoration methods. You can combine any fabric such as poly twills or felts or combine with other decoration methods such as laser engraves, printed patches or woven patches. The advantages of applique are stable, durable, brilliant. Graphics are set up once and used for unlimited times. Price is affected by the size of the graphic, and other fabrics or decoration methods used, not the colors. Applique is cost effective for larger graphics and smaller runs.

## Advantages

✓ Ideal for creating a premium, textured effect with multiple fabrics.

## Applications

✓ Recommended products: Athletic fleece, Softshells, Technical outerwear, Team wear, Bags.

# LASER ENGRAVE

laser engrave is applicable on almost any kind of fabrics, but most suitable for thicker fabrics, such as poly fleeces and cotton fleeces. Products have to be able to lay flat for laser engraves. Graphics are set up once and used for unlimited times, but there is machine set up costs each time the graphic is used. Price is affected by the size of the graphic. The larger size the higher price. Laser engrave is cost effective for small graphics and smaller runs.

## Advantages

Ideal for tone-on-tone design with extremely precise and intricate details, which can be applied over seams, zippers, plackets, and more. Environmentally friendly and long lasting durability to washing.

## Applications

Recommended products: Polos, Softshells, Lightweight shells, Fleece, Team wear, Bags.
